

EFA-SRT® CR Premium: The tightest door of its kind

With the EFA-SRT® CR Premium EFAFLEX has developed a door type specifically in response to the needs of clean room environments (GMP), where effective sealing even with high pressure differences is critical, for example in air locks. Air loss is constantly reduced to a minimum even with strong pressure on the door curtain, increasing the life expectancy of air filters. The door model is characterized by its hygienic design, avoiding surfaces where particles could settle.

Top cover

- Available with either 15° or 45° inclination or straight to the ceiling, reducing particle settlement

Control EFA-TRONIC®

- Fully integrated within the door leg
- With frequency converter

Door curtain

- 2 mm thick Transilon curtain
- With or without vision window
- Several colour options

Finish

- Stainless steel or powder coating acc. to RAL

Safety

- Photo cell in combination with contact edge
- Infra-red light curtain (TLG) optionally available

Door legs include

- Foil membrane pad.
- Manual opening utilizing spring tension
- Optional emergency opening via UPS
- Emergency stop button

General

- Door opening speed up to 1,0 m/sec
- Max. sizes
W = 2,500 mm x H = 3,000 mm
- TÜV Certification for clean room class 5 following norm ISO 14644-1
